INDEX

Govt.Model Engineering College,Thrikkakara
Managed by Institute of Human Resources Development
A Govt.of Kerala Establishment
Department of Computer Engineering
B.Tech in Computer Science and Engineering

	Vision	Mission
INSTITUTION (Model Engg. College)	Evolve into an academy of excellence to serve the knowledge society.	M1: Implement quality education through Teaching Learning Process. M2: Inculcate culture of technical innovations and creativity. M3: Instill high standards of professional ethics and social values.
DEPARTMENT (Computer Engineering)	Evolve into a center of excellence to serve the emerging knowledge society.	M1: Impart quality education to the graduate and undergraduate students in Computer Science and Engineering. M2: Inculcate students with technical knowledge and human values to create socially committed Engineers. M3: Empower the students to succeed in innovative research and developments to serve the computational needs of the society.

	Govt.Model Engineering College,Thrikkakara Managed by Institute of Human Resources Development A Govt.of Kerala Establishment Department of Computer Engineering B.Tech in Computer Science and Engineering

PROGRAM OUTCOMES

PO1:Engineering knowledge	Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
PO 2: Problem analysis	Identify, formulate, review research literature, and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences.
PO3:Design/development of solutions	Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
PO4:Conduct investigations of complex problems	Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.
PO 5: Modern tool usage	Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.

	Govt.Model Engineering College,Thrikkakara
	Managed by Institute of Human Resources Development
	A Govt.of Kerala Establishment
	Department of Computer Engineering
	B.Tech in Computer Science and Engineering

PO 6: The engineer and society	Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
PO 7: Environment and sustainability	Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
PO 8: Ethics	Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
PO 9: Individual and team work	Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
PO 10: Communication	Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

	Govt.Model Engineering College,Thrikkakara
	Managed by Institute of Human Resources Development
	A Govt.of Kerala Establishment
	Department of Computer Engineering
	B.Tech in Computer Science and Engineering

PO11:Project management and finance	Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
PO12: Life-long learning	Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.

PROGRAM SPECIFIC OUTCOMES

PSO1: Hardware & Software	An ability to analyze, design, and develop system software, secure application software, intelligent systems, computer architecture, and network-based computing solutions.
PSO2:Problem Solving	An ability to analyze & design algorithms, and implement the solutions incorporating various programming concepts.
PSO3:Project Management	An ability to apply diverse software project development approaches to tackle real time problems.

	Govt.Model Engineering College,Thrikkakara
	Managed by Institute of Human Resources Development
	A Govt.of Kerala Establishment
	Department of Computer Engineering
	B.Tech in Computer Science and Engineering

PROGRAM EDUCATIONAL OBJECTIVES

PEO1:Lifelong Learning	**To produce graduates with solid foundation in Computer Science & Engineering and broad knowledge in mathematics, applied science and basic engineering with competence for higher studies and to pursue a profession in computing.**
PEO2:Entrepreneurship	**To impart an educational foundation that enables them to be good entrepreneurs and be adaptive to the advancements in the latest technologies.**
PEO3:Social Commitment & Leadership	**To make them capable to function in multi-disciplinary teams, ethically and responsibly, contributing to the information technology requirements of the society.**

LAB RULES

1.   BE PUNCTUAL FOR THE LAB.

2.   STUDENTS SHOULD LEAVE THEIR FOOTWEAR OUTSIDE THE LAB IN THE SPACE PROVIDED.

3.   KEEP YOUR BELONGINGS OUTSIDE THE LAB.

4.   RECORD ENTRY AND EXIT TIME IN THE LOG-REGISTER WHILE USING THE LAB.

5.   COME WELL PREPARED WITH RECORD FOR DOING THE EXPERIMENT.

6.   AVOID STEPPING ON ELECTRICAL WIRES OR COMPUTER CABLES.

7.   DO NOT SHIFT OR INTERCHANGE ANY PART OF THE COMPUTER WITH ANOTHER.

8.   FOR ANY HARDWARE PROBLEM, REPORT TO THE LAB-IN-CHARGE / LAB STAFF.

Govt.Model Engineering College,Thrikkakara
Managed by Institute of Human Resources Development
A Govt.of Kerala Establishment
Department of Computer Engineering
B.Tech in Computer Science and Engineering

9. **STUDENTS SHOULD MAINTAIN SILENCE AND DECORUM IN THE LAB.**

10. **STUDENTS SHOULD LOG OFF THE COMPUTERS AND ARRANGE THEIR SEATS BEFORE LEAVING THE LABORATORY.**

11. **VIOLATION OF LAB RULES WILL NECESSITATES IN THE LOSS OF YOUR LAB PRIVILEGES**

	Govt.Model Engineering College,Thrikkakara
	Managed by Institute of Human Resources Development
	A Govt.of Kerala Establishment
	Department of Computer Engineering
	B.Tech in Computer Science and Engineering

INSTRUCTIONS FOR MAINTAINING THE LAB RECORD

1. The index page should be filled properly by writing the corresponding experiment number, name and date on which the experiment was performed.
2. Every experiment conducted in the lab should be noted in the fair record.
3. For every experiment in the fair record the right-hand page should contain

   - **Title:** The experiment heading on top of the page in capital letters with experiment number and date of experiment.
   - **Aim:** The aim of experiment in one or two sentences clearly.
   - **Algorithm:** Steps for doing the experiment.
   - **Result:** The result of the experiment must be summarized.

4. The left-hand page should contain

   - A **print out of the code** used for the experiment
   - **Sample output** obtained for a set of input.

	Govt.Model Engineering College,Thrikkakara
	Managed by Institute of Human Resources Development
	A Govt.of Kerala Establishment
	Department of Computer Engineering
	B.Tech in Computer Science and Engineering

Course code	Course name	L-T-P	Year of Introduction
CSL411	COMPILER LAB	0-0-3-2	2019

Pre-requisite : CSL331 System Software Lab,CST 301 Formal languages and Automata Theory, CST 302 Compiler Design

SYLLABUS

1. Implementation of lexical analyzer using the tool LEX.

2. Implementation of Syntax analyzer using the tool YACC.

3. Application problems using NFA and DFA.

4. Implement Top-Down Parser.

5. Implement Bottom-up parser.

6. Simulation of code optimization Techniques.

7. Implement Intermediate code generation for simple expressions.

8. Implement the back end of the compiler.

Govt.Model Engineering College,Thrikkakara
Managed by Institute of Human Resources Development
A Govt.of Kerala Establishment
Department of Computer Engineering
B.Tech in Computer Science and Engineering

Course Objectives:

To implement the different Phases of the compiler.
To implement and test simple optimization techniques.
To give exposure to compiler writing tools.

Expected Outcome:

The Student will be able to :
i. Implement the techniques of Lexical Analysis and Syntax Analysis.
ii. Apply the knowledge of Lex & Yacc tools to develop programs.
iii. Generate intermediate code.
iv. Implement Optimization techniques and generate machine level code.

Govt.Model Engineering College,Thrikkakara
Managed by Institute of Human Resources Development
A Govt.of Kerala Establishment
Department of Computer Engineering
B.Tech in Computer Science and Engineering

PRACTICE QUESTIONS

List of Exercises/Experiments :

1. Design and implement a lexical analyzer using C language to recognize all valid tokens in the input program. The lexical analyzer should ignore redundant spaces, tabs and newlines. It should also ignore comments.

2. Implement a Lexical Analyzer for a given program using Lex Tool.

3. Write a lex program to display the number of lines, words and characters in an input text.

4. Write a LEX Program to convert the substring abc to ABC from the given input string.

5. Write a lex program to find out the total number of vowels and consonants from the given input string.

6. Generate a YACC specification to recognize a valid arithmetic expression that uses operators +, − , *,/ and parenthesis. COMPUTER SCIENCE AND ENGINEERING

7. Generate a YACC specification to recognize a valid identifier which starts with a letter followed by any number of letters or digits.

8. Implementation of Calculator using LEX and YACC

9. Convert the BNF rules into YACC form and write code to generate abstract syntax tree.

Govt.Model Engineering College,Thrikkakara
Managed by Institute of Human Resources Development
A Govt.of Kerala Establishment
Department of Computer Engineering
B.Tech in Computer Science and Engineering

10. Write a program to find ε – closure of all states of any given NFA with ε transition.

11. Write a program to convert NFA with ε transition to NFA without ε transition.

12. Write a program to convert NFA to DFA.

13. Write a program to minimize any given DFA.

14. Write a program to find First and Follow of any given grammar.

15. Design and implement a recursive descent parser for a given grammar.

16. Construct a Shift Reduce Parser for a given language.

17. Write a program to perform constant propagation.

18. Implement Intermediate code generation for simple expressions.

19. Implement the back end of the compiler which takes the three address code and produces the 8086 assembly language instructions that can be assembled and run using an 8086 assembler. The target assembly instructions can be simple move, add, sub, jump etc.

Govt.Model Engineering College,Thrikkakara
Managed by Institute of Human Resources Development
A Govt.of Kerala Establishment
Department of Computer Engineering
B.Tech in Computer Science and Engineering

CSL411 COMPILER LAB COURSE OUTCOMES

CSL411.1	Implement lexical analyzer using the tool LEX. (Cognitive Knowledge Level: Apply)
CSL411.2	Implement Syntax analyzer using the tool YACC. (Cognitive Knowledge Level: Apply)
CSL411.3	Design NFA and DFA for a problem and write programs to perform operations on it. (Cognitive Knowledge Level: Apply)
CSL411.4	Design and Implement Top-Down parsers. (Cognitive Knowledge Level: Apply)
CSL411.5	Design and Implement Bottom-Up parsers. (Cognitive Knowledge Level: Apply)
CSL411.6	Develop intermediate code for simple expressions. (Cognitive Knowledge Level: Apply)

CO-PO MAPPING

Evaluation Methods For Laboratory Experiments:

Assessment Methods	Continuous Internal Evaluation				
Rubrics	R1	R2	R3	R4	R5
Marks	15	10	5	15	15
Total	60				

Criteria	Parameters evaluated	Performance indicators		
		Beginning(1)	Satisfactory(2)	Exemplary(3)
Algorithm And Program(R1)	● Clarity of the problem ● Neatness and completeness in the algorithm and program	Lack of clarity Of the problem. Algorithm and program are not accurate.	Demonstrates fair understanding of the concepts and problem. Algorithm and program needs minor correction.	Demonstrates appropriate understanding of the concepts and problem. The algorithm and the program are accurate and neat.

Govt.Model Engineering College,Thrikkakara
Managed by Institute of Human Resources Development
A Govt.of Kerala Establishment
Department of Computer Engineering
B.Tech in Computer Science and Engineering

Viva(R2)	● Knowledge of concepts and procedure. ● Pre-requisite knowledge needed for implementing the problem.	Unable to articulate the concepts and does not answer most of the questions.	Articulates fairly well and answers most of the questions correctly.	Good command over the concepts associated with the problem and answers all questions.
Record(R3)	● Promptness in submission. ● Neat documentation. ● Accurate output	Incomplete /Late submission of the record.	Late submission. Record documentation is fair.	Record submission on time. Record documentation is complete and neat with perfect outputs.

Govt.Model Engineering College,Thrikkakara
Managed by Institute of Human Resources Development
A Govt.of Kerala Establishment
Department of Computer Engineering
B.Tech in Computer Science and Engineering

Time utilization and completion(R4)	• Follow the instructions given to complete the lab • Completion of the lab in allotted time.	Unable to follow the verbal and written instructions to complete the lab. Failed to complete even a part of the lab in allotted time.	Unable to follow some of the verbal and written instructions to complete the requirements of the lab The student failed to complete the entire lab in the allotted amount of time	Able to follow the verbal and written instructions to successfully complete requirements of the lab. The student completed the lab in its entirety in the allotted amount of time
Continuous assessment Test (R5)	The assessment test shall be conducted for 100 marks, which will be converted to out of 15. The marks will be distributed as, Algorithm - 30 marks, Program - 20 marks, Output – 20 marks and Viva - 30 marks.

SAMPLE PROGRAMS

1. Design and implement a lexical analyzer for given language using C and the lexical analyzer should ignore redundant spaces, tabs and newlines.

Program

```c
#include<stdio.h>
#include<stdlib.h>
#include<string.h>
#include<ctype.h>

int isKeyword(char buffer[]){
 char                          keywords[32][10]                     =
{"auto","break","case","char","const","continue","default",

"do","double","else","enum","extern","float","for","goto",

"if","int","long","register","return","short","signed",

"sizeof","static","struct","switch","typedef","union",
                                   "unsigned","void","volatile","while"};
 int i;
 for(i = 0; i < 32; ++i){
        if(strcmp(keywords[i], buffer) == 0){
              return 1;
        }
 }
```

Govt.Model Engineering College,Thrikkakara
Managed by Institute of Human Resources Development
A Govt.of Kerala Establishment
Department of Computer Engineering
B.Tech in Computer Science and Engineering

```c
 return 0;
}

int main() {
 char c, buffer[31], operators[] = "+-*/%=";
 FILE *fp;
 int i, j=0;

 fp = fopen("Program","r");

 if(fp == NULL){
        printf("Error while opening the file\n");
        exit(0);
 }

 while((c = fgetc(fp)) != EOF) {
              for(i = 0; i < 6; ++i){
                    if(c == operators[i])
                          printf("%c is operator\n", c);
              }

              if(isalnum(c)) {
                    buffer[j++] = c;
              } else if((c == ' ' || c =='\t' || c == '\n') && (j != 0)) {
        buffer[j] = '\0';
        j = 0;
```
